### ABOUT

A full-stack web developer with 2 years of experience in building and maintaining web applications. Skilled in Node.js, Express, MongoDB, and React, with experience in both **backend** development and **frontend**. I am experienced in MERN stack development and have worked on various projects, including a **Marketplace** (Auto-Advisor), an **OTA** (Rinor), and several other projects as a freelancer. Proven ability to design and implement robust, scalable, and high-performing systems. Strong background in web

Thank you for considering me. I am excited to see what challenges and opportunities the future holds!.

### WORK EXPERIENCE

#### MERN Stack Developer at Car Advisors

📅 Dec 2022 – current

- Developed a robust and scalable REST API for the Car Advisor product auto-advisors application using Node.js, Express, MongoDB, and Mongoose, ensuring efficient data management and manipulation.
- Successfully integrated the API with the frontend superadmin dashboard, allowing for seamless communication between the frontend and backend systems and improving overall user experience.
- Demonstrated strong design skills by creating and implementing missing pages in the frontend superadmin dashboard, built with React, that improved the functionality and usability of the application.
- Implemented a comprehensive continuous integration and deployment (CI/CD) pipeline on AWS, streamlining the development process and ensuring reliable and consistent releases.

#### MERN Stack Developer at Rinor

📅 Sep 2021 – Nov 2022

- Worked as a MERN stack developer for Rinor, a travel agency in Skardu that specializes in ticketing, hoteling, and tour booking.
- Conducted research on how to effectively handle the company's operations online and how to interlink different aspects of the business.
- Designed and developed the OTA website using TailwindCSS, TypeScript, and React.
- Implemented a dashboard using Material-UI, JavaScript, and React, and completed 3-4 modules of the project.
- Utilized Node.js, Express, MongoDB, Mongoose for backend development, effectively managing the development process as the only developer on the project.

#### Frontend Developer at PIXL

📅 July 2020 – Aug 2021

- Worked as a freelance web developer, completed 3-4 projects related to tourism and a website for NFT gaming.
- Acquired projects through personal networks and connections, rather than through marketplaces.
- Designed website using CMS for Baltistan Tours (baltistantours.com) which is one of leading company of Pakistan in Trekking & Tours Organization since 1990s.
- Developed Hotel Management Application Using MERN Stack for Karakoram Lodge Khaplu.

### EDUCATION

B.S Computer Science

From **PMAS-AAUR**

📅 September 2018 - June 2022

📍 Rawalpindi, Pakistan

### LANGUAGES

- HTML/CSS
- C++,
- JavaScript,

### TOOLS & TECHNOLOGIES

- NodeJS,
- ExpressJS,
- MongoDB,
- Mongoose,
- GraphQL,
- Bootstrap,
- Material-UI
- TailwindCSS,
- SASS,
- React,
- Git,
